

VNT

Automotive

Quality for future

Global competence & years of experience

TIER 1
OEM

Wir sind TISAX
zertifiziert!

Complete solutions are offered for cold-forming sheet metal thanks to the combination of tool making and metal pressed part production.

VNT Automotive is leading the way in the production & procurement of tools for steel and aluminium sheet metal pressed part production and is a recognised supplier of sheet metal and structural assemblies.

BENEFIT TO YOU:
BEST PRICE-PERFORMANCE RATIO WITH THE
HIGHEST QUALITY STANDARDS.

History

TIER 1
OEM

Wir sind TISAX
zertifiziert!

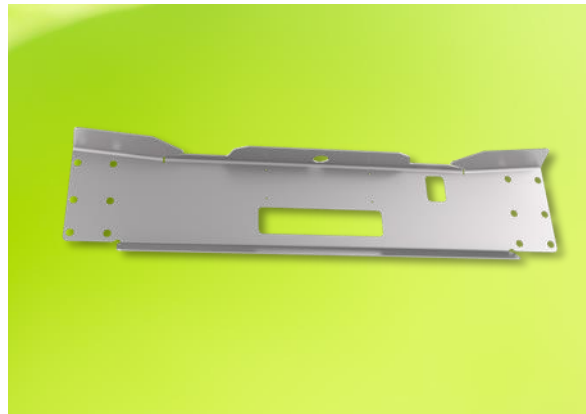

- 1872 • Vogel & Noot founded the Wartberg/Mürztal headquarters. Steel and iron machining dictate the history of Vogel & Noot. Steel and sheet metal are processed using their own rolling mills.
- 1997 - 2001 • The Vogel & Noot technology division positions itself as a competent supplier for the car industry in Central Europe with links to tool making in Wartberg and the pressing plant in Hungary.
- 2005 • Vogel & Noot technology is separate from Vogel & Noot Holding AG and is under a new ownership structure with the objective of continuing the positive growth development.
- 2009 • The company underwent restructuring in line with market requirements to enable it to continue to provide clients with the best price-performance ratio by meeting all of our quality standards.
- 2013 • Thanks to further investments in the sheet metal and assembly production sector, but also in tool making, the VNT Group has the opportunity to continue to pursue its growth strategy.
- 2014 • Vogel & Noot Technology has changed to **VNT Automotive Group** to include arranging realignment and reorganisation for the independent supplier beyond Europe.
- 2018 • Enhanced with H5 and a 2,000 tonne tryout press
